Awaiting Gatekeeper review

Personal late arrivals: 0 / Deductions: 0 / Current coursework allowance: 50
Team standings and recorded reward value are unchanged. Standing is current at issue; the Gatekeeper checks the latest record before use.

Remain present in the realm. Bring back the work that proves your journey.

Coursework use requires Gatekeeper verification of attendance, required artifacts and any deductions. The amount shown is a potential allowance, not a posted grade or a spendable account balance.

Keep your place in the realm

A team member who misses a class day or does not submit required assignment artifacts loses the coursework use of their team-earned points. Those points become Mortal Points: the game achievement and other reward value remain, but the allowance of up to 50 points for coursework is void.

Arrive with your company

Each late arrival deducts 15 points from your personal coursework allowance after the cap: 50 becomes 35, then 20. The allowance cannot fall below zero. Your team’s score and prize standings stay unchanged. Attendance is verified in class; connection problems are not proof of lateness or absence.

Choose when to use your award

You do not have to use eligible points on today’s assignment. You may save them for an instructor-approved final project or approved rewards, such as Codex stickers or pantry items. The Gatekeeper confirms eligibility, available rewards and the exchange rate before use.

Carry your record with you

Keep this certificate and its signed receipt. A Learners.cloud account is optional for class participation. Account storage is planned; this certificate does not deposit points, issue Units or guarantee an exchange.
